

EA19D

DUAL MOVING-IRON METER AC Ammeter and Voltmeter

APPLICATION

The panel electromagnetic meter with a double measuring system is designed to measure AC current with a frequency of 15 ... 400 Hz and a voltage of 15 ... 100 Hz. The meter will be used, among others, in switchgears, control cabinets of generators and wherever there is a limited space for measuring two electrical quantities.

EA19D meters are designed for mounting into panels with thickness not exceeding 25 mm in the holes 92 x 92 mm.

TECHNICAL DATA

Accuracy class	1
Measuring ranges, self-consumption, front frame dimensions, length of scale, weight	acc. to tab. 1, 2
Rated operating conditions:	
- ambient temperature	5...23...55°C
- relative air humidity	25...85%
- frequency of measured quantity	for In: 15...400Hz for Un: 15...100Hz
Execution of ammeters	normal scale version or version with 100% overload. Other overcurrent scale, on request after agreement.

Additional errors according to EN 60051-2
Execution of ammeters with the nominal range scale according to table 1; or an extended scale with a value of 2- or 6-times overload or another agreed with the manufacturer.

Categories of meter climatic versions
If it is not written otherwise in the order, these meters are intended to use in moderate climatic conditions.
On customers' request, meters can be adapted to use in conditions of a dry or wet tropical climat.
Then, they are marked with the T III symbol.

Requirements concerning safety acc. EN 61010-1 standard:

- installation category	III
- pollution degree	2
- maximal phase-earth working voltage	600 V

Electromagnetic Compatibility:

- meters meet requirements CE mark	
- noise immunity	acc. to EN 61000-6-2
- noise emissions	acc. to EN 61000-6-4

The power consumed by the meter

- voltage circuit:	< 4.5 VA
- current circuit for In<15A:	< 0.5 VA
- current circuit for In>15A:	< 0.8 VA

Masa

EA19D	200 g
-------	-------

Electrical overload:

- long-term	120% In, 120% Un
- short-time current measurement	10 times for 5s
- short-term voltage measurement	2 times for 5s (max. 1000V)

Impact resistance

- peak acceleration	15 g
- duration of impact	11 ms

Shock resistance

- range of vibration frequency	10-55-10Hz
- vibration amplitude	0.15 mm (corresponds to 1.5 g at 50 Hz)

Protection Grade acc. to EN 60529 ensureb by:

- case:	standard	IP 52
	custom-made	IP 65
- terminals		IP 20

Case material

thermoplastic material, self-extinguishing plastic (UL 94V-O)

Meter glass material

glass, plastic or anti-reflective glass (acc. to ordering code)

ACCESSORIES

Screw holders - 2 pcs.

Additional setting pointer

On customers' request EA19D meters can be equipped with an additional, setting red pointer fixed on the glass.

AC CURRENT AND AC VOLTAGE DIRECT MEASUREMENT RANGES
