NMID12LITE

SINGLE-PHASE DIN RAIL ENERGY METER

Overview:

NMID12LITE is a modern Single Phase Direct Connected AC Energy Meter designed for intended use in residential, commercial and light industrial Electrical Energy Metering. The meter is engineered using advanced microcontroller technology and is suitable for electrical parameter measurement and monitoring in 1 Phase 2 Wire Networks. It supports maximum 45 A current measurement on direct connection. It supports Tariff Counters selectable via Tariff input. It displays parameters on bright LCD and also has Pulse Output and Impulse LED for energy monitoring. Meter housing is standard Din Rail Mount that allows ease of installation.

FEATURES

Direct Connection Meter:

The meter can safely measure 45 A maximum current on direct connection, eliminating the use of expensive external CT for high current networks. Meter is also self-powered thus offer simplified connections.

Measured Electrical Parameters:

The meter is primarily for bidirectional Active, Reactive and Apparent Energy measurement but it also accurately measures important electrical parameters like Voltage, Current, Frequency, Active, Reactive and Apparent Power, and Power Factor in Single Phase Networks. The measured parameters can be viewed on display.

Demand:

The Demand parameter for Active Power (Import/Export), Reactive Power (Import/Export), Apparent Power and Current are calculated as per configurable Demand Integration time.

Pulse Output:

The meter has one optional opto-isolated potential free pulse output that can be configured for any one of the Active (Import/Export), Reactive (Import/Export) and Apparent Energy parameter. The pulse width and rate of pulse out is onsite programmable.

Impulse LED:

The meter has Impulse LED which flash at rate of 1000 impulse per 1 kWh indicating the Active Energy consumption.

LCD:

The LCD has bold seven segment digits with bright white backlit for display of measurement parameters. Measurement screen can be set as automatic scrolling or manual scrolling.

Front Key:

One key is provided for easy navigation and accessibility of different parameters.

Tariff Input:

The meter has one Tariff Input dedicated for selection of active tariff T1 and T2. The opto-isolated Tariff is rated for a wide range of AC voltage for operation.

Dual tariff:

The meter has Tariff Counters for energy accumulation which are selectable via Tariff Input. Energy for tariff are Active Energy (Import/Export/Total), Reactive Energy (Import/Export/Total) and Apparent Energy.

Compliance to Standards:

National / International Standards are complied

Accuracy Standard: EN50470-3 :2022

IEC62053-21

IP for water & dust: IEC 60529

Plastic Flammability Standard: UL 94

Safety Standard: 62052-31:2015
